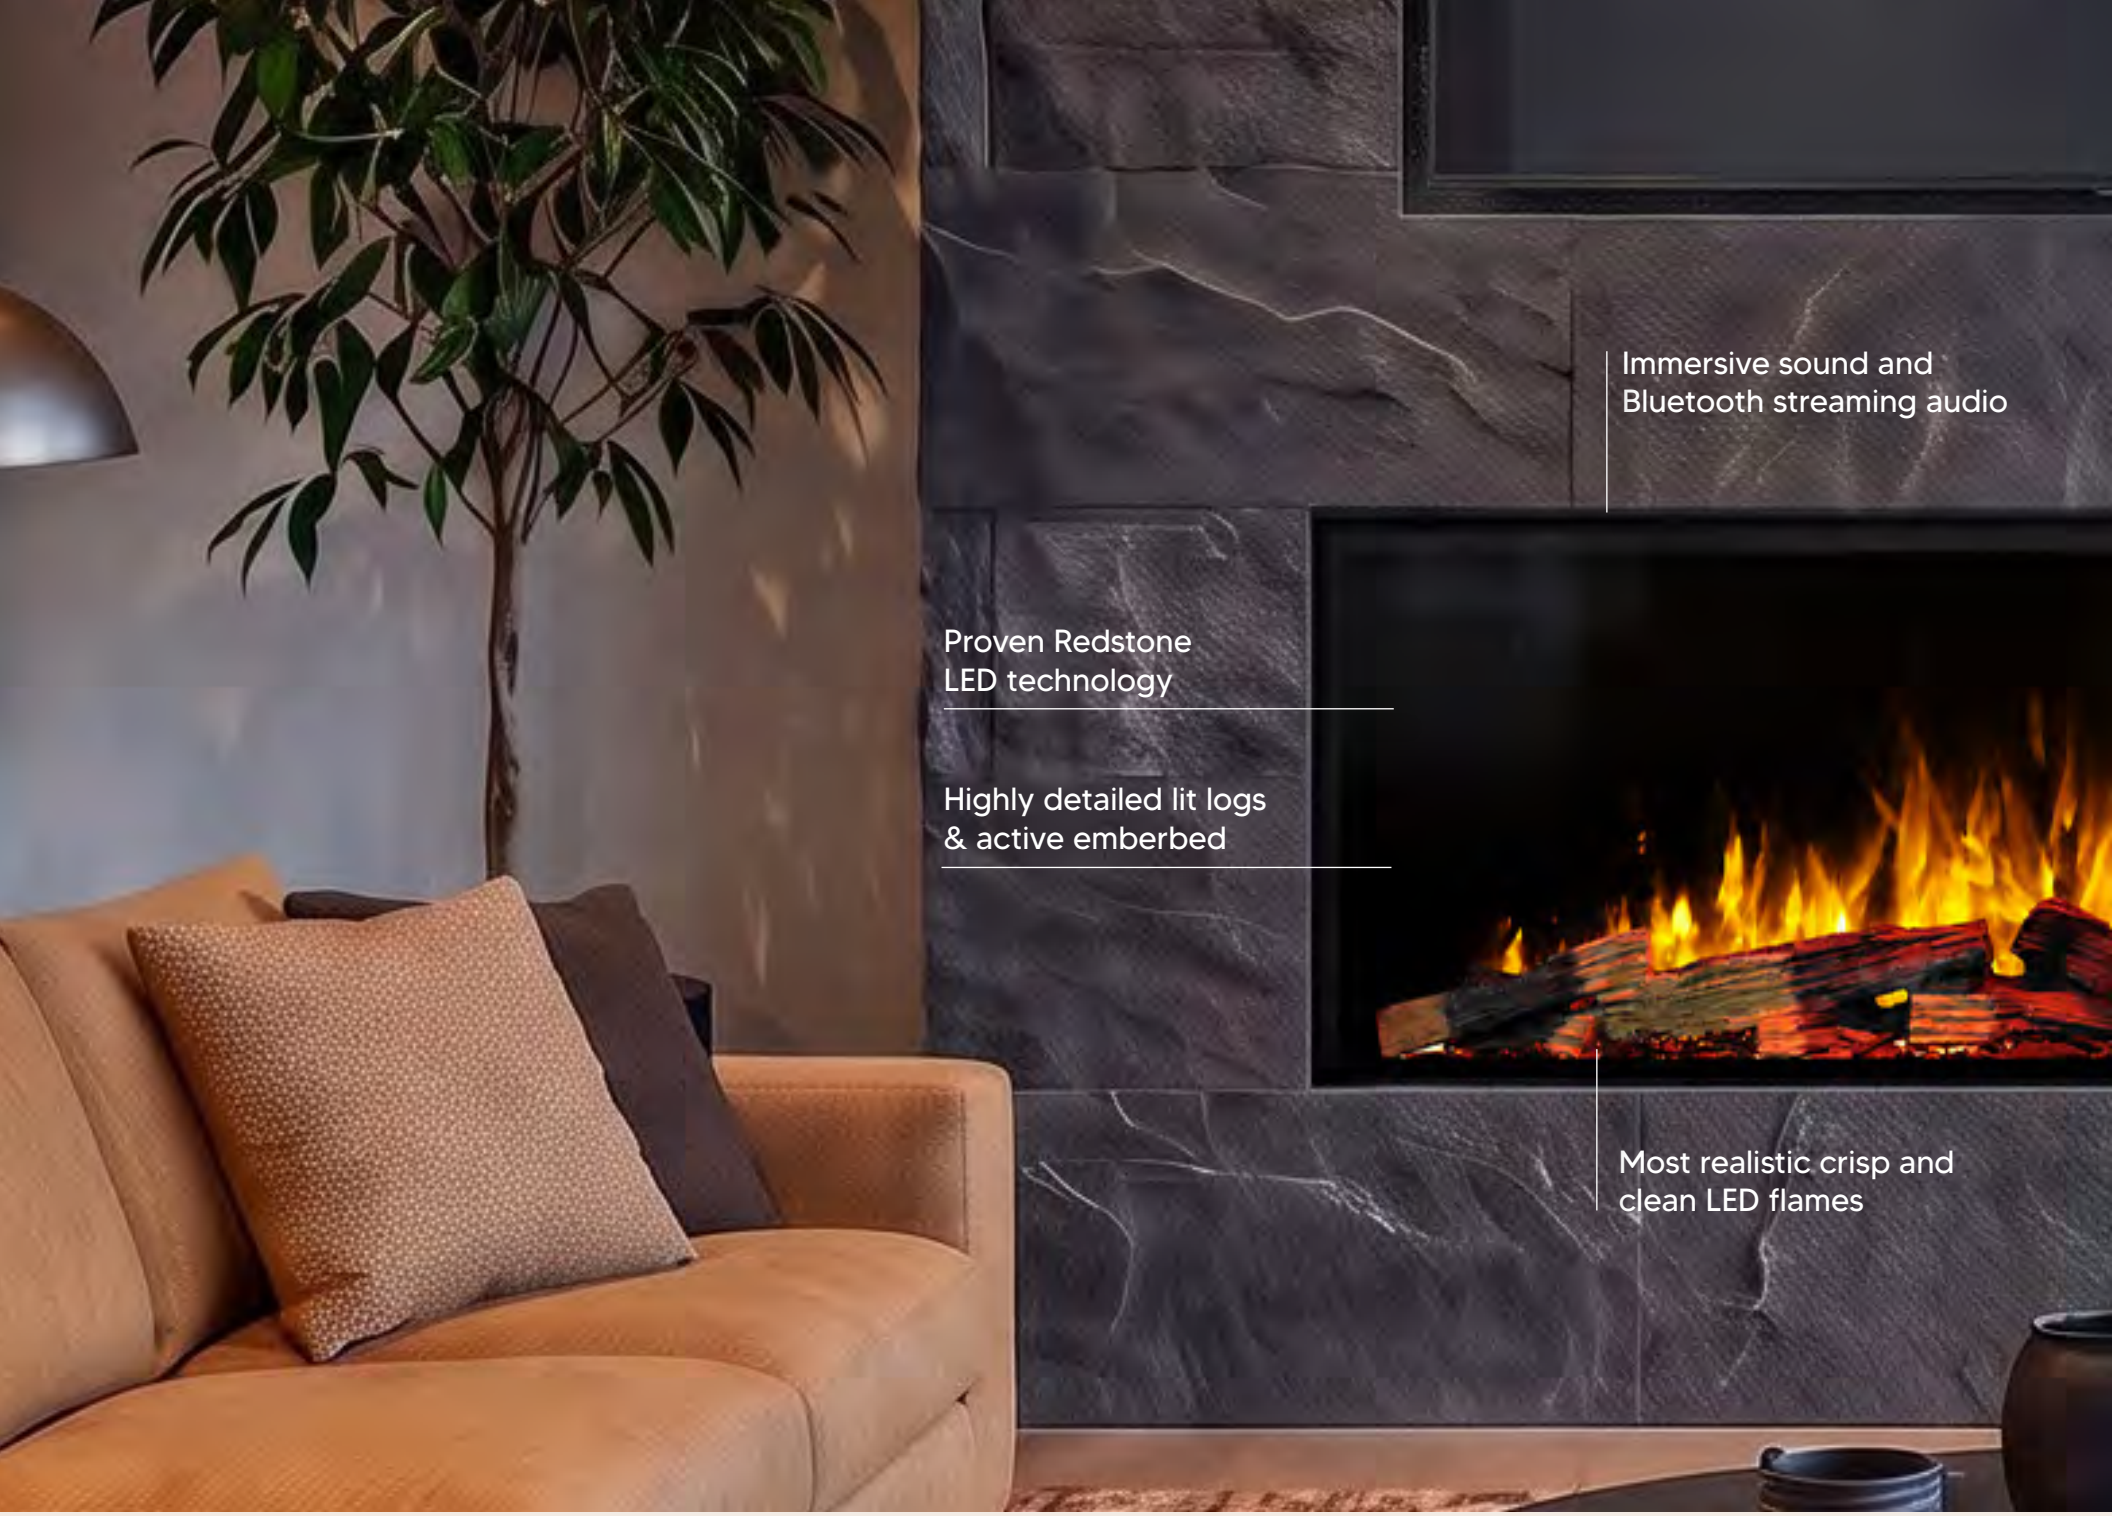
Proven Redstone Performance, Now in a Linear Format.

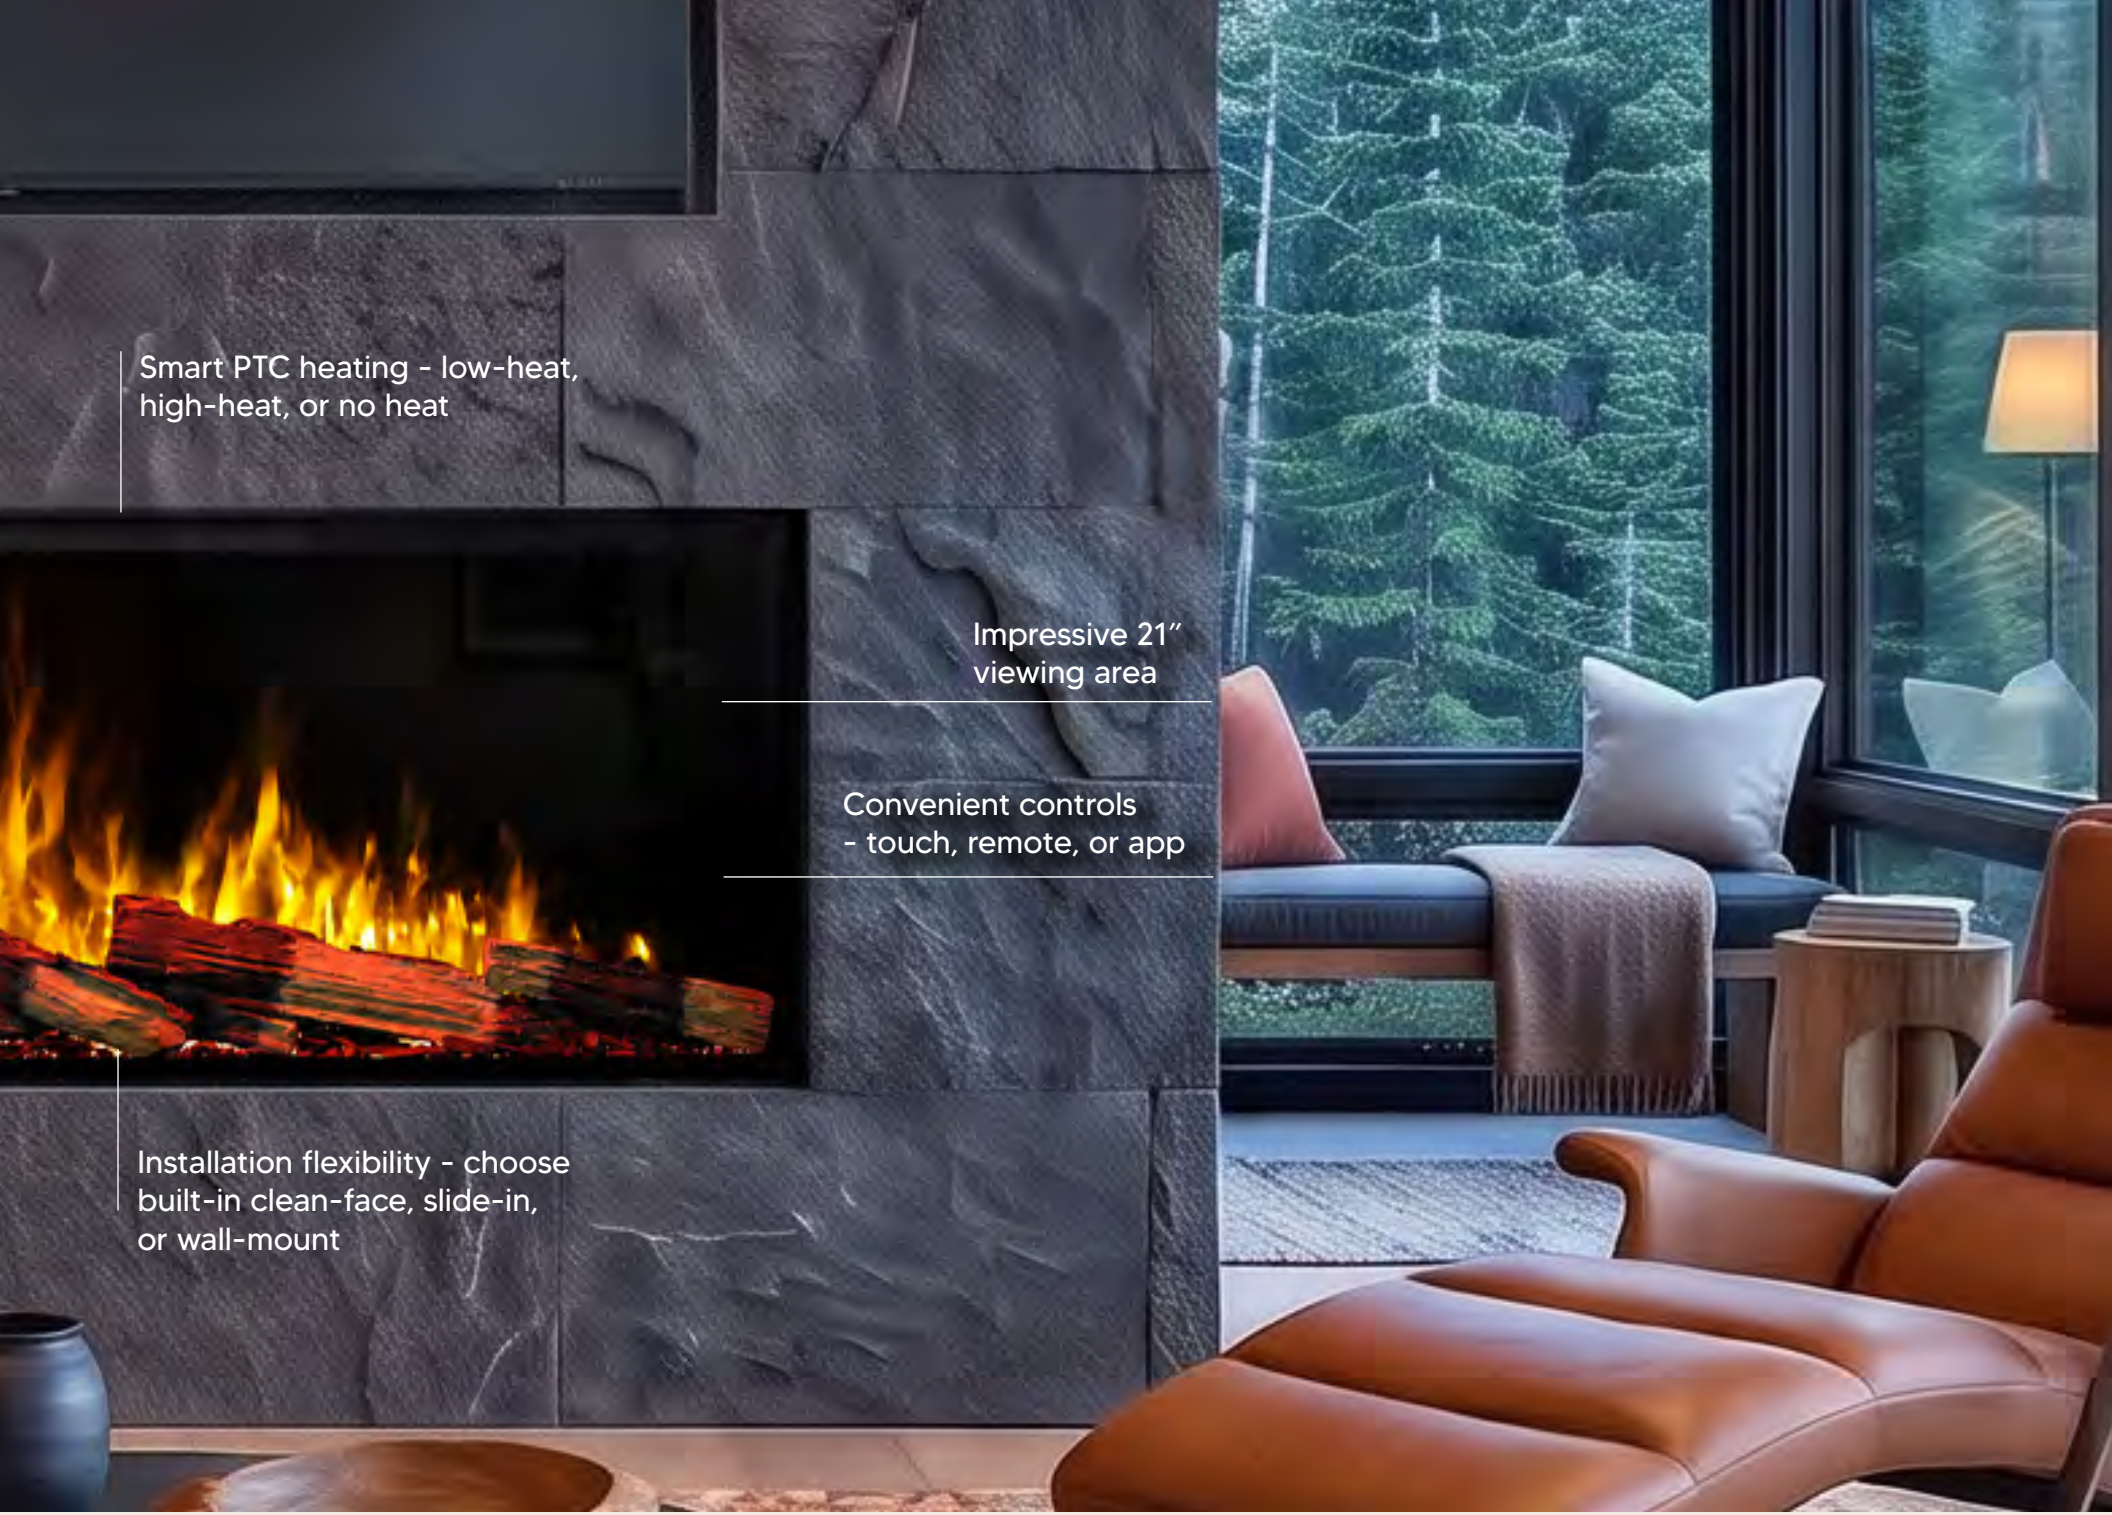
Redstone V2 Linear brings the proven performance and value of the Redstone series to a contemporary linear design. Its expansive 21-inch viewing height gives flames, illuminated logs, and an active ember bed a more substantial presence, creating an inviting focal point for everyday living.

From a quiet evening at home to time spent with family and friends, the experience is yours to personalize. Choose from 10 flame colors, adjust flame speed and brightness, and coordinate the ember bed and downlighting. Add one of 3 crackling soundscapes or stream your favorite music through the built-in Bluetooth-enabled speakers.

Enjoy supplemental warmth at half-heat or full heat when you need it, or keep the flames, lighting, and sound on without heat for year-round enjoyment. With convenient app, remote, and touch controls, Redstone V2 Linear makes it easy to personalize your fireplace experience to fit your lifestyle.



Immersive sound and
Bluetooth streaming audio
Proven Redstone
LED technology
Highly detailed lit logs
& active emberbed
Most realistic crisp and
clean LED flames



Smart PTC heating - low-heat, high-heat, or no heat
Impressive 21″ viewing area
Convenient controls - touch, remote, or app
Installation flexibility - choose built-in clean-face, slide-in, or wall-mount

LED Flames for Everyday Living

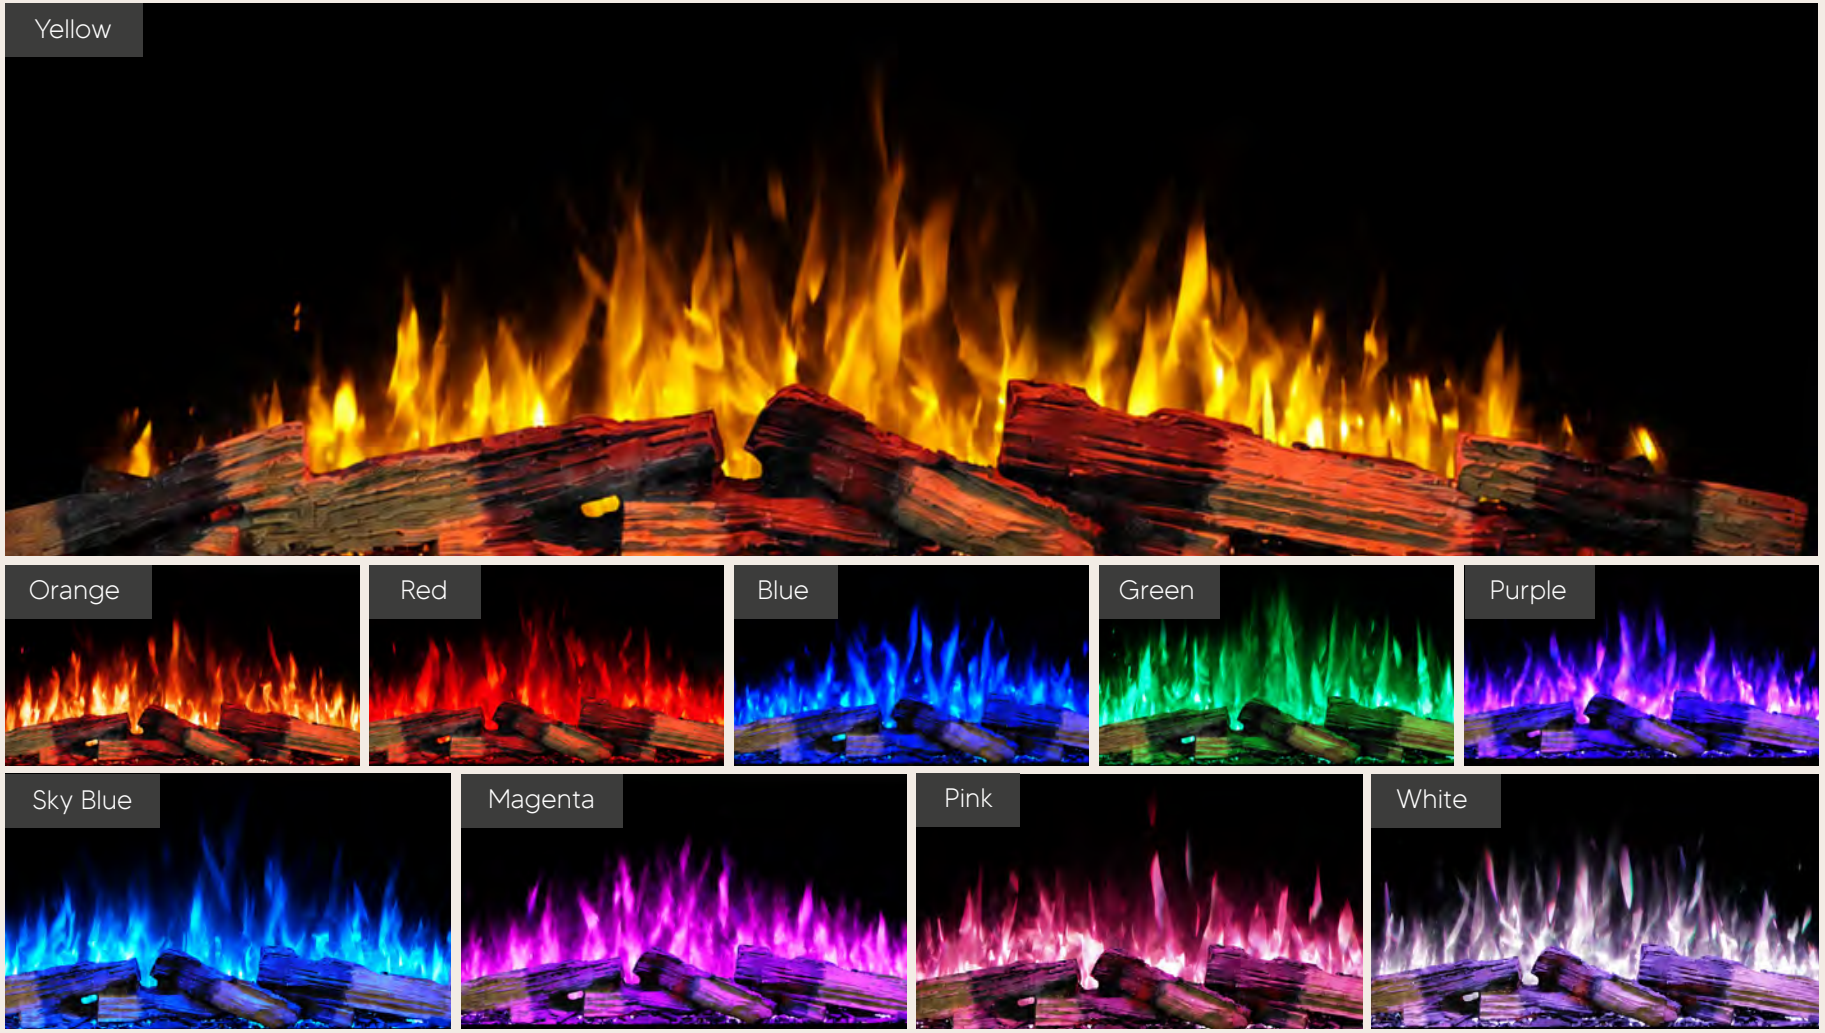
Redstone V2 Linear delivers Modern Flames' most realistic LED flame experience yet, combining crisp, clean flames with natural movement and exceptional clarity. Dynamic flames move naturally above an illuminated log set and active ember bed, creating layers of color, light, and movement that bring depth and dimension to the fire. Together, these elements create a captivating focal point that enhances the room, with or without heat.

Set the atmosphere with adjustable flame speed and brightness. Choose a warm flame appearance for a relaxed evening, then coordinate the downlighting and ember bed to suit the room. With 10 flame color options, you can change the look whenever you want.

10 flame colors | Adjustable speed | Adjustable brightness

Find Your Flame Color

Choose from 10 flame colors to complement your space and the occasion. Keep the look familiar with warm tones or explore a more colorful display, then coordinate the ember bed and downlighting to complete the atmosphere.



Details That Bring Fire to Life

Realism goes beyond the flames. Illuminated logs, an active ember bed, and downlighting bring added depth and detail to the Redstone V2 firebox.

Illuminated Log Set

The included illuminated log set adds texture and a warm glow beneath the flames. Downlighting highlights the logs, adding depth to the firebox, even when enjoying the fireplace without heat.

Active Ember Bed

Glowing movement beneath the logs brings another layer of life to the fire. Adjust the ember bed lighting to complement your flames, from a warm fireside glow to a more colorful display.

Complete Control, Your Way

Enjoy effortless control of your Redstone V2 Linear fireplace with convenient options. Adjust your fireplace using the Modern Flames app, included remote, or built-in control panel to create the perfect fireside experience.

Modern Flames App

Customize flame colors, brightness, speed, and other fireplace settings directly from your smartphone.

Upgraded Remote Control

The included magnetic remote keeps convenient control close at hand. Adjust settings from your seat to personalize the fireplace experience without interrupting the moment.

Built-In Control Panel

Access essential fireplace functions with easy-to-use controls located directly on the unit.

Redstone V2 Linear

Choose your finish. Then plan your installation.

Choose the sleek, seamless look of a built-in clean-face design, the framed finish of a self-trimming slide-in, or the convenience of a wall-mount. Select your favorite before framing begins for a fireplace that is made for your space.

Installation Options

Built-In Clean Face

Self-Trimming

Wall-Mounted

More heating flexibility. More ways to save.

Configure the Redstone V2 for no heat or low heat without requiring a dedicated electrical circuit to help reduce wiring and installation costs. Low-heat operation uses less energy than full heat, helping lower operating costs while still providing warmth. A dedicated 20-amp circuit is required for full heat output.
