**FUSIONFIRE™**

The First Steam Fireplace

The FusionFire™ Steam Fireplace is the next step in Modern Flames’ revolutionary line of innovative fireplace products that will forever change the way people view fireplaces. This is the first product in the hearth industry to successfully bridge the gap between gas and electric fireplaces by combining the natural, three-dimensional flame appearance of a gas fireplace with the safety and ease of installation of an electric fireplace. This award-winning product gives the natural, three-dimensional flame of real fire by using water and electricity instead of wood or fossil fuels.
